

# BROADY G. BUTLER

Melbourne, FL 32935 | [broadybm@gmail.com](mailto:broadybm@gmail.com) | 618-201-6079

Portfolio: [butlerdev.com](http://butlerdev.com) | Github: [github.com/broadaciousb](https://github.com/broadaciousb)

## SUMMARY

A detail-oriented software developer transitioning from a project management background in civil engineering, with expertise in building, debugging, and enhancing the performance of full-stack web applications. Experience using **React**, **Next.js**, **TypeScript**, **Express.js**, **React Native**, **Firebase**, and integrating REST APIs backed by **SQL** databases. Passionate about building intuitive, user-friendly websites and committed to continuous learning while contributing to innovative web development projects.

## PROFESSIONAL EXPERIENCE

[Autoshops.com](http://Autoshops.com) – Remote

May 2025 – Present

### Frontend Developer

- Developed, tested, and debugged **React** components while resolving UI issues and improving application responsiveness.
- Collaborated with developers across 20+ Git branches and pull requests using **GitHub**, ensuring smooth code integration and feature delivery.
- Built an iOS application using **Expo** and **React Native** that integrates with **REST APIs** for authentication and application data.

**Keystone Engineering and Consulting** - Cocoa Beach, FL

September 2019 – Present

### Project Manager

- Documented progress, repairs, and provided consultation for clients and contractors for 100+ construction projects, utilizing **Microsoft Word** and **Microsoft Excel** for tracking progress and budgets.
- Analyzed budgets and reviewed payment applications for projects with contract sums up to **\$1,000,000** to identify discrepancies, leading to corrections that saved tens of thousands of dollars for clients and contractors.
- Interpreted project specifications and compared them to on-site inspections using blueprint reading and knowledge of construction codes (**ACI**, **ICRI**) to improve quality control for hundreds of repairs.
- Facilitated meetings with clients to discuss deliverables, budgets, and resolve conflicts, leveraging communication tools (**Zoom**, **Microsoft Teams**) and conflict resolution techniques to ensure smooth project progression.

## OTHER PROJECTS

**Summarist – Book Subscription Site** – [website link](#)

- Built a full-stack book subscription platform using **Next.js**, **TypeScript**, **Redux**, **Firebase Authentication**, **Stripe Payment Processing**, and **REST APIs**.
- Implemented server-side rendering to improve performance and reduce page load times.
- Integrated Stripe payment processing and user authentication.
- Developed reusable, well-documented, and maintainable components following modern **JavaScript** best practices.

## TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, HTML, CSS, SQL (academic)
- Frameworks:** React, Next.js, Express.js, React Native
- Databases:** Firebase, PostgreSQL (academic)
- Tools:** Git, GitHub, Redux, Material UI, Tailwind CSS, Stripe

## EDUCATION

**Southern Illinois University Carbondale** - Carbondale, IL

**Degree:** Bachelor of Science in Civil and Environmental Engineering (GPA: 3.38)

**Relevant Courses:** Calculus 1 – 3, Statistics, Differential Equations, AutoCAD
